

MSTEP 2016 Results

Summative assessments like the MSTEP provide important information for our district about how well we are providing instruction and services to students in relation to other districts in our state. Most scores from districts in the state have increased slightly from last year and as a district we continue to be pleased with our performance.

Historically, South Lyon Community Schools have scored high in relation to both Oakland County and the State of Michigan. We remain one of the top performing districts in Oakland County and the State of Michigan..

South Lyon is above the State of Michigan averages on all 18 assessments and above or tied with the Oakland County average in 17 of the 18 assessments.

When compared to 2015 district results, this year's increased proficient or advanced M-STEP scores occurred in:

- 4th, 5th, 6th, and 8th grade English Language Arts
- 4th, 6th, and 8th grade Mathematics
- 4th and 11th grade Science
- 8th grade Social Studies

Individual student MSTEP reports have been mailed home. This information has been provided to our teaching staff as well as parents. The data is one piece of information about your child's progress and we use many pieces of data to make instructional decisions. Proficiency levels change over time and this is only a "snapshot" of where your student was on the day(s) of testing last spring.

Instructional staff and administration will be using individual student scores to target interventions for students along with using school and district level scores to continue to make improvement in our overall programs.

If you have any questions regarding your child's proficiency levels, please contact your school principal or your student's teacher.

Mission Statement

In support of community, the mission of the South Lyon Community Schools is to provide the highest quality educational process so that all students can excel as individuals and become contributing members of society
